

KVH[®]

TracVision[®] SlimLine Series Satellite TV as mobile as you are!

HDTV
compatible

TRACVISION[®]

SATELLITE TV BY KVH

KVH's new TracVision SlimLine antenna systems let you take your favorite TV programming on the road with you...wherever you go!

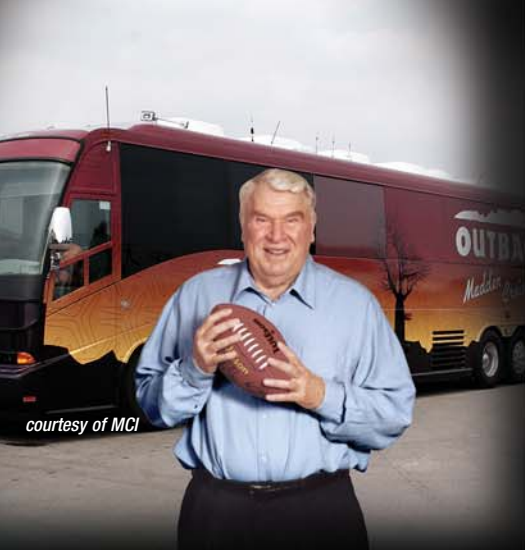

With access to over 300 channels of crystal-clear satellite TV programming, including digital-quality satellite radio and the easiest mobile HDTV solution available, there will never be a dull moment in your RV!

Imagine having access to real-time weather reports, breaking news, sporting events, and television shows wherever you travel! And TracVision SlimLine systems offer fully automatic satellite switching using your remote control so that you can surf from standard definition TV to HDTV and back again, right from your chair – just like at home!

The low-profile 12" high TracVision SlimLine family of products offers the easiest and most reliable connection to the outstanding entertainment offered by DISH Network[®], DIRECTV[®], or ExpressVu.

The new TracVision SlimLine Series – making it easy to take the entertainment you enjoy along for the ride!

Never miss the fun on the road!

“The bus is often better equipped for watching games and doing my pre-game homework than the nice hotels where I stay. I’ll go down on the bus and watch the games there where I can choose which games to watch. With the great HD-television quality, TracVision is the best seat in town for watching the game.”

— John Madden,
Hall of Fame NFL Coach
and Emmy Award-winning
Broadcaster

Choose TracVision, choose the best!

KVH’s TracVision® SlimLine Series lets you experience what satellite TV in an RV was meant to be! TracVision systems are hassle-free, easy to install, and automatically configurable to work with any North American satellite service. Fully compatible with premier HDTV programming from DISH Network and ExpressVu,¹ these systems are unmatched in their quality and reliability. With four different 12" high designs, the TracVision SlimLine Series brings the best in mobile satellite TV to every RV owner, no matter what their needs are or where they are going.

▶ Best reception and tracking in the RV industry –

Laboratory testing proves that TracVision SlimLine systems offer better reception than even the competition’s larger 15" antennas for crystal-clear reception when parked or on the go...and in all weather conditions!

▶ Easy to use and works just like at home –

TracVision SlimLine’s fully automatic satellite switching allows you to watch all of your satellite TV service’s programming, even when the channels are broadcast by different satellites! Simply change the channel with the remote and TracVision immediately switches to the new satellite, whether you’re driving or you just want to change from a standard definition channel to a high-definition channel. It’s as easy as that and available exclusively from KVH!

▶ #1 choice in the RV industry –

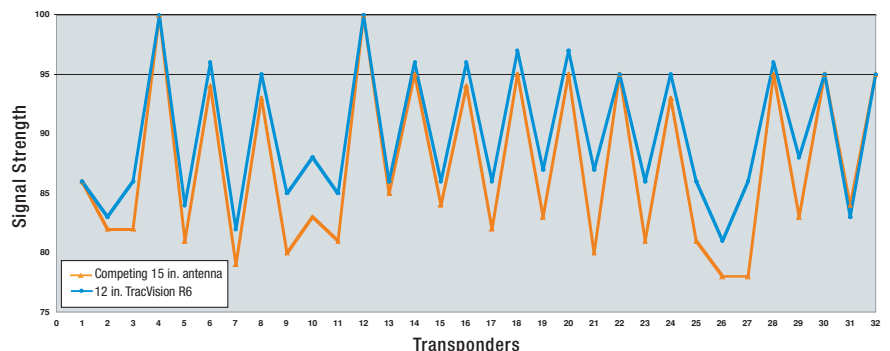

Premier RV manufacturers nationwide choose the TracVision SlimLine Series because they know they can rely on KVH for the highest-quality product on the market.

▶ Built to last –

KVH stands behind the unmatched quality and reliability of its products. As manufacturers of military and marine products for over 20 years, KVH knows how to build a system that you can rely on for years of enjoyment and outstanding performance. Just take a look under one of our domes and compare it to the competition to see the difference in quality of manufacture and design. No wonder KVH is the world’s leading manufacturer of mobile satellite TV antenna systems for RVs, boats, and automobiles, with over 150,000 antennas fielded worldwide!

High signal strength means you can still watch TV in bad weather

In laboratory tests, TracVision SlimLine antennas have been proven to offer better reception than larger competing antennas because they are more powerful (higher signal gain). Higher gain means your TracVision can receive weaker signals so you can enjoy TV even in the rain, fog, or snow when competing antennas can’t! When less-than-perfect weather keeps you inside, make sure you have the satellite TV system that delivers the channels you want, not the message, “SEARCHING FOR SATELLITE”!

¹ Requires a compatible HDTV receiver and HD-ready television; see www.kvh.com/HDTV for more details.

KVH's all-new 12" high TracVision SlimLine Series

RV owners no longer have to choose between an attractive system and a reliable one! KVH's TracVision SlimLine Series' super-efficient, 12" high, domed antennas not only look great on any RV, but ensure that you'll receive crystal-clear reception and the finest tracking available, wherever you go!

TracVision A7

5" high, In-motion Satellite TV Antenna System with Integrated 12V DIRECTV Receiver

For vehicles needing a streamlined look such as conversion vans or vehicles with low-clearance requirements such as tall motor-coaches – the 5" high TracVision A7 is the ideal in-motion* standard definition DIRECTV satellite TV antenna system.

* The TracVision A7's flat dome is ideally suited to in-motion operation and, like all flat top antennas, may experience rain fade from standing water when the RV or coach is parked.

The #1 choice of RV manufacturers

"KVH's TracVision antennas allow our customers to stay in touch with the world around them through news, music, and entertainment, wherever they travel. We selected KVH and its TracVision systems as our satellite TV solution because they offer the same high quality, value, and versatility that our customers expect of Monaco coaches."

— Pat Carroll,
Vice President of
Product Development,
Monaco Coach Corporation

KVH – the leader in mobile satellite antenna systems

KVH Industries is the world's leading provider of mobile satellite television antenna systems as well as the #1 choice of North America's premier RV manufacturers. With more than 150,000 mobile satellite antennas sold, KVH has supplied more in-motion satellite TV and communications systems for mobile applications than any other manufacturer in the world. Tens of thousands of RV, motorcoach, boat, and automobile owners enjoy digital-quality television programming thanks to KVH's diverse family of award-winning TracVision antennas.

"We've had a very positive experience with our TracVision and, after showing it to other folks, we know a lot of other guys who are putting KVH systems on their trucks. The TracVision has been reliable and it's been great working with the people at KVH. Every time we've called with a question, we talk to someone who cares. They want the product to work and it does."

— Robert Daniels
long-haul truck driver/owner;
TracVision owner for more than
1.2 million miles

Unsurpassed warranty and support

KVH's commitment to quality and reliability is unmatched; TracVision antennas are the most reliable on the road. Every TracVision system undergoes the most stringent quality checks in the industry, including highly accelerated lifecycle testing, military specification environmental tests, shock and vibration testing, and in-depth functional evaluations prior to delivery. An ISO 9001:2000-certified organization, KVH meets the highest international standards for quality. Our award-winning commitment to quality is also illustrated by our industry-leading warranty as well as our exclusive Platinum Protection Plan, which allows you to extend your warranty for an additional 2 years! We offer North America's broadest network of authorized dealers, 24/7 online support and troubleshooting; a responsive technical and customer support team; and highly trained dealers in KVH's Certified Support Network (CSN).
